SUMMARY

Immediate joiner with a strong interest in data analytics and hands-on experience in SQL, Microsoft Fabric, Python, Excel, Power BI, and Snowflake. Demonstrates strong communication and problem-solving skills, with a focus on converting data into actionable business insights.

SKILLS

- Tools & Technologies:** Microsoft Excel (Pivot Tables, Power Query), Power BI, Tableau, MySQL, Snowflake, Databricks, Microsoft Fabric
- Programming & Querying:** SQL (Advanced Queries, Joins, CTEs), Python, DAX
- Data Analysis Techniques :** Data Cleaning, EDA, Statistics, Data Modeling, Data Visualization, ETL Pipelines
- Soft Skills:** Business Communication, Problem-Solving, Analytical Thinking, Presentation

WORK EXPERIENCE

- Thomas Cook India Limited** Aug 2025 - Oct 2025
- Reviewed domestic and international travel package sales data to identify demand trends and growth opportunities.
 - Supported data-driven sales strategies, contributing to a 30% increase in package sales.

PROJECTS

- Pharmacy Sales and Profitability Analysis-** Project Link | **Snowflake** | **Power BI** Jan 2026
- Evaluated multi-country pharmacy sales and profitability data to track revenue, units sold, and margin trends across regions, pharmacy types, and product categories.
 - Identified revenue concentration and performance gaps, where 20–30% of regions generated over 60% of total revenue, and pharmacy-level results varied by 15–25% within the same region.
 - Assessed product mix and promotion impact, finding promoted sales delivered 10–18% lower value per unit, supporting margin-focused pricing and promotion decisions.
- E-Commerce Toy Store Sales Analysis –** Project Link | **Python** Jan 2026
- Used Python (Pandas, EDA techniques) to assess customer funnel performance, identifying a 6.8% session-to-order conversion rate and early drop-offs impacting revenue.
 - Observed 1.3 million dollars in revenue with 85 thousand dollars lost to refunds, highlighting refund-heavy products and revenue leakage across a small subset of SKUs.
 - Compared customer segments, channels, and devices, identifying higher lifetime value from returning customers, stronger organic and search conversion, and lower mobile performance.
- Department Operation Analytics –** Project Link | **Fabric** | **Power BI** Dec 2025
- Built an end-to-end analytics solution to monitor department budgets, capital allocation, and project performance, enabling centralized reporting and consistent KPI tracking across teams.
 - Used SQL, data modeling, and DAX to surface over-budget departments and cost distribution patterns, supporting early risk detection and financial control decisions.
 - Enabled proactive monitoring that supported an estimated 7–12% improvement in budget efficiency through automated refresh and executive-ready dashboards.

EDUCATION

- Harish Chandra P.G. College,** Bachelor of Computer Application Aug 2023 – June 2026
- Percentage - 70

CERTIFICATIONS

- Microsoft Certified Fabric Analytics Engineer – **Microsoft** Dec 2025
- Databricks Fundamentals - **Databricks** Jan 2026
- Snowflake Hands-On Essentials: Data Warehousing Workshop - **Snowflake** Oct 2025
